

HarmoNIA challenges in synthesis:

- From good monitoring data to good decision making
- Harmonize monitoring protocols for reliable assessment of Good Environmental Status.
- Towards a common strategy to assess contaminant dispersion risk
- Best practices to support a sustainable use of the sea: the offshore challenge

[Click Here for a summary of our activities:](#)

- Definition of a Methodological Proposal for harmonized monitoring of contaminants in the ADRION region (currently available upon request)
- HarmoNIA Data Portal to discover and access more than 5.600 datasets on marine contaminants collected in seawater, sediments and biota in the Adriatic - Ionian Region

- HarmoNIA GeoPortal on Vulnerability of coastal areas to understand pressures and vulnerability in your area

- Useful outcomes from stakeholders engagement available on:

- Constructive dialogue with a variety of stakeholders during our [workshops](#) in Athens (Greece), Split (Croatia), Patras (Greece) and several other meetings, and with the society during the European Researchers Night:

We take the opportunity to invite you at our next stakeholder workshop in Trieste on 18 - 19 March 2020, in the framework of the Euroscience Open Forum proESOF event <http://www.proesof2020.eu/>

HarmoNIA is funded by Interreg V-B ADRION Programme www.adrioninterreg.eu
